* Version 9.3	Feb 2012	Mar 2012	Mar 2013	Sep 2013	2013	Apr 2014

* Version(s) with active enhancement development

Please go to [Retired Versions](#) page to see information on older release versions.

Early Adoption (EA): This represents a phase, 45-90 days prior to GA, in which a selected clients participate in an intense testing program on the pre-generally available release. Tyler strives to select a cross-section of customer participants to represent our client base ensuring maximum coverage. This "real world" testing of the product enables Tyler to deliver the highest quality, customer-tested release. For information on how to participate in the Early Adoption Program, please contact [Munis Release Management](#).

General Availability (GA): This represents a 12 month phase in which a product release (ex. Version 7.5) is made available for installation at client sites. Technology upgrades (ex. Version 9.0) are not intended for general availability.

Feature Complete (FC): This represents a 3 to 6 month phase in which the given release has matured through the EA and GA phase and minimal development efforts need to be placed on the product for the remainder of its life. Clients are encouraged to move to a more current release.

Next Release Planning (NRP): This represents a phase in which the given release has been available for up to 18 months and is at least 2 product releases behind the latest available Munis release. Clients are *strongly* encouraged to move to a more current release.

Product Retired (PR): This represents a release phase that receives only minimal support services. Clients *must* move to a more current release in order to receive year-end W-2 and 1099 releases.

NOTE: The timelines and specific dates related to our release life-cycle policy are tentative and subject to change.
